How to **NOT** do that

Why **Evals**?

- Ahead-of-time **Reliability**
- Exploit **Mitigation**

What are **Evals**?

Unit Tests

Reliability Instrumentation

for Deterministic Systems

Eval's

Reliability Instrumentation

for Non-Deterministic Systems

Fuzzy Unit Tests

Unit Test: did this function
return exactly 42?

Unit Test: did this function return exactly 42?

Eval: Did this agent behave acceptably across many scenarios?

Components of **Evals**

Components of Evals

- Test Cases
- Expected Behavior
- Judge (Scorer)
- Aggregate Results

Given a **scenario**, did the
agent...

Given a **scenario**, did the **agent**...

- follow policy?
- use the right tools?
- resolve the issue?
